

THOMSON REUTERS KORTES

METHODOLOGY

Crude oil shipments to Russian refineries. (INE5)

Content:

Volume of shipments of crude oil and gas condensate from oil producing companies to Russian refineries by types of transport.

Sources of information:

- CDU TEK statistical data on crude oil and gas condensate shipments to the refineries
- Data on shipments of crude oil by rail
- Thomson Reuters Kortes information

Initial data in the Report is processed and adjusted as the information is further detailed.

Data structure:

The data on the volume crude oil shipments (refineries in the first column, crude oil producers in the second) is provided with a breakdown by following types of transport:

- Via Transneft's system
- Via Transneft's system/transshipment to rail
- Via Transneft's system/transshipment to motor vehicles
- Ferry/transshipment to rail
- Rail
- Pipelines excluding Transneft system.

The list of types of transport may vary depending on whether this type was used for shipments in respective month or not.

Slavneft's shipments are included to Rosneft's and Gazprom Neft's ones.

Dimensions: thousand tonnes (kt)

Periodicity of publication:

Monthly, before the end of month following the reporting month.

Publication form:

The report is provided in .xlsx file.

Methodology. Russian crude oil exports (INE4).
