METHODOLOGY. OIL PRODUCTS

RETAIL PRICES AT FILLING STATIONS IN RUSSIAN REGIONS

Contents

Price assessments of motor fuels (gasoline and diesel) at gas / filling stations in the Russian regions, indicated in roubles per litre, issued at 5 pm Moscow time on the date of publication. Prices are published in the Thomson Reuters Information Systems and the "Retail prices at gasoline/ filling stations in the regions of the Russian Federation (gasoline and diesel fuel)" bulletin.

Data Sources

Participants of the retail market and owners of filling stations.

Market Players

Sales representatives of regional divisions of oil companies, large- and medium-sized independent operators of the regional retail market.

Data Considered for Assessment

Information provided by retail market participants on prices at filling stations in the Russian regions.

Data Collection Methods

Polling of retail market participants via phone. Getting information through communication channels.

Data Reliability

Data reliability is ensured through the collection and analysis of information of similar type obtained simultaneously from the maximum possible number of retail market participants representing all together at least 80% of the regional retail market.

Frequency of Update

Weekly, every Friday.

Relevance

Prices effective at the date of publication.

Prices

Quoted in roubles per litre, with taxes.

Price Range

Reflects the minimum and maximum prices of various operators of the retail market in the region. The aggregated price value equals to the average price.

Average Price

A price that equals to arithmetic mean value of prices obtained as a result of monitoring

$$P_{avg} = \frac{\sum_{i=1}^N \left(\frac{P_{min}^i + P_{max}^i}{2} \right)}{N}$$

P_{min}^i – P_{max}^i – minimum and maximum price for the i -basis considered for calculation of the average price

N – the number of bases used to calculate the average price

The average price can be calculated for Federal administrative regions of Russia, the European part of Russia and Siberia and the Far East, and an aggregate price assessment for Russia (on a country level).

Locations (bases)

71 regions of the Russian Federation (Annex 1); the number of regions included in monitoring can vary.

Groups of Market Products

Monitoring also includes price assessments for premium class motor fuels — branded fuel. A list of companies and brands of marketable fuel in the retail sector are provided in Annex 3.

Discontinuation of price assessment and changes in quote lists

Price assessments may be added or deleted from the list at any time with the prior notification if the market situation requires such changes.

Blank price assessment

In case if the price assessment is temporarily not updated the current value of the price assessment will be marked as UNQ (UNQUOTED) in the system. In case when Thomson Reuters KORTES spots absence of sales and receives confirmation from the market participants that there is a lack of trading activity in the market, Thomson Reuters KORTES continues publishing the last relevant quotation during 5 (five) working days and terminates the quotation on the 6th business day.
