

THOMSON REUTERS KORTES

METHODOLOGY

Production and distribution of gasoline on the domestic market and export with breakdown by refineries (BBE12)

Content: Gasoline production volumes, supplies to the domestic market and export for the reporting month and year to date.

Product: Gasoline.

Data sources:

- CDU TEK gasoline production statistics by large and mini-refineries of Russia;
- CDU TEK gasoline statistics on volumes of supplies to the domestic market and export;
- CDU TEK statistics on gasoline intakes into «Transnefteproduct» pipeline. CDU TEK statistics on gasoline supplies through «Transnefteproduct» pipeline to the domestic market and export;
- Railway statistics;
- Customs statistics;
- Information gathered by Thomson Reuters KORTES.

The report structure:

Production and supplies data is presented by producers, companies and for Russia as a whole for the reporting period and year to date.

The data on gasoline supplies is shown as total with breakdown by destinations of supplies - to the domestic market and export.

Gasoline supplies to the domestic market and export are presented as total with breakdown by types of transport (railway, pipeline, water and road transport). The data on volumes of water and road transportation is calculated as the difference between all shipments and water and pipeline transport.

Gasoline production and supplies by companies are calculated as the sum of production volumes by large and mini-refineries affiliated with the company. The ownership of refineries is indicated in accordance with the source of initial information.

The data for Russia as a whole is calculated as the sum of volumes of production by companies, independent refineries and mini-refineries.

Gasoline production and supplies to the domestic market and export are calculated as the sum of data for each month from the beginning of the year.

Dimension: Thousand tonnes.

Periodicity of issue: Monthly, by the 10th day of month following the reporting month.

Issue form: The report is provided in the xlsx file on several spreadsheets. The number of spreadsheets depends on number of months passed from the beginning of the year. The data is shown as a cumulative sum. The «month» sheet contains data for the relevant month, while the cumulative data is shown on the «YTD» sheet.

Methodology. Production and distribution of gasoline to the domestic market and export with breakdown by refineries (BBE12).
