

THOMSON REUTERS KORTES

METHODOLOGY

Naphtha shipments to Russian enterprises (NRE1)

Content: Naphtha shipments from Russian large refineries, mini-refineries and gas processing plants for the needs of domestic consumers for the reporting period and year to date.

Products: Straight-run gasoline, stable natural gasoline, gasoline for the chemical industry, gas condensate distillate.

Data sources:

- Naphtha railway shipment statistics;
- Information gathered by Thomson Reuters KORTES.

The data shown in the report is preliminary analyzed and adjusted as far as the latest information is available.

The report structure:

The data on naphtha shipments for domestic consumers is divided into: the group of products, the type of plant (refinery or gas processing plant), the purpose of the use with the division on petrochemicals and others.

If there are naphtha shipments for further use in petrochemical industry, in the report are indicated the end consumers.

The data for Russia as a whole is calculated as the sum of shipment volumes by group of products with breakdown by purpose of use.

The data is presented for each reporting month and year to date.

Dimension: Thousand tonnes.

Periodicity of issue: Monthly, no later than 30 days after the reporting month.

Issue form: The report is provided in the xlsx file.

Methodology. Naphtha shipments to Russian enterprises (NRE1).
